

**PARTICLE-FORMING COMPOSITIONS CONTAINING FUSED  
PYRROLOCARBAZOLES**

**ABSTRACT**

A non-aqueous, particle-forming, fused  
5 pyrrolocarbazole-containing composition is disclosed. Upon  
contact with an aqueous medium, the particle-forming  
composition spontaneously disperses into suspended  
particles, thereby forming a stable suspension that provides  
greatly improved bioavailability of orally administered  
10 fused pyrrolocarbazole compounds.
